# OUR STORY

It all began in 1999, inside a humble house in Caloocan City, Philippines, where Neptel assisted customers in need of structured cabling services. It was only a couple of years later when we acquired an office space of our own in Makati City, and developed to become general contractors for office fit-outs.

As a result of our commitment to growth, service, and excellence, we have shifted our focus to designing and building office spaces, making our services a one-stop-shop for all building and renovation needs; from designing, building, to structured cabling, electrical and mechanical services, among others.

The vision to transform people's lives through Neptel's services has been engraved in our hearts from the moment the company was built, until today. Simply put, it is what keeps the company going.

# WHAT WE BELIEVE IN

## VISION

Shape experiences through remarkable designs and solutions that bring value, ease, and enhanced quality of life.

# CLIENT TESTIMONIALS

## JOJO PILI

Chief Operating Officer

Dynamic Business Outsourcing Solutions Philippines

"It was a privilege working with Neptel. From the on-set, they were very polite when we did our inquiry when they did our proposal. They were very responsive from the rendering, and they have an excellent rendering team, up to the construction from the project managers, down to their basic painters and carpenters. They were very easy to deal with, reasonable price, and excellent results. Price was very, very reasonable but they did not sacrifice the quality. "

## TREVOR MANALO

Systems and Infrastructure Support Operation Services Group

Schneider Digital Schneider Electric Philippines

"It has been a great 3 years and counting working with Neptel. They have been the best cabling support that I have, it makes my work easier for me. It's like having another set of hands moving around in different locations where I could never possibly do at the same time. Their engineers are well trained that you wouldn't need to micro manage them."
